SKILLS

Adobe suite

Ai (Midjourney, firefly)

Brand identity

Website Design

Basic video editing

GOALS AND OBJECTIVES

Think

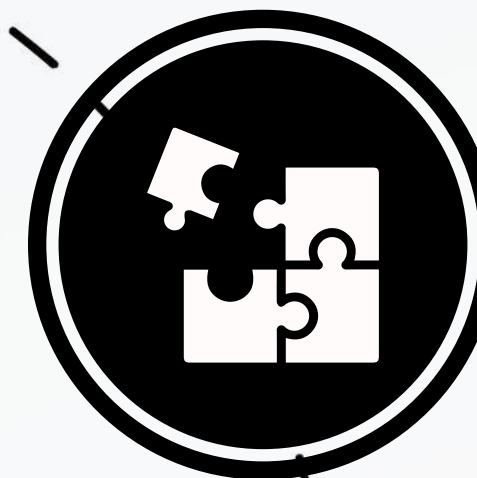

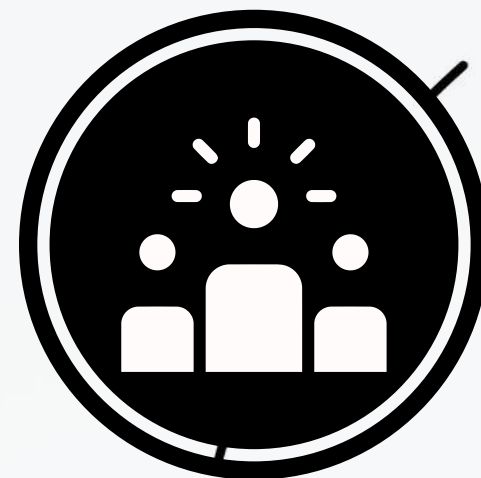

Through thorough research and creative exploration, I conceptualize unique design solutions tailored to meet project objectives and engage target audiences effectively.

Design

Utilizing pen and paper, I sketch out initial design concepts, allowing for rapid iteration and exploration of various layouts and visual elements to refine ideas before transitioning to digital platforms.

Execute

Leveraging advanced graphic design software, I meticulously bring the refined concepts to life, integrating color, typography, and imagery to create polished and impactful final designs that resonate with clients and end-users.

The background is a light gray color. It features several decorative elements: a series of thin, black, wavy lines in the top right corner; a series of thin, black, wavy lines in the bottom left corner; and several white, rounded rectangular shapes of varying sizes and orientations scattered across the center and right side. The text "SOCIAL MEDIA" is positioned above "DESIGNS", both in a bold, black, sans-serif font.

SOCIAL MEDIA DESIGNS

"Global Digital is a company that provides services such as web development, graphic design, UI/UX design, digital marketing, etc."

YOUR GROWTH, OUR MISSION
